Subject: RE: who manages your ERG contract in AED - EOM

Hi all - Tuesday 3/19 morning is open on my end. We might want to block an hour ... maybe plan the second half for getting into the weeds of the SOW.

Marcia - any idea of the total number of sites/wells you'll be providing? Any data or example data set that you can send in advance might help us better prepare for the kickoff.

Thanks,

Casey

Great! My contact is Casey Pickering (cc'd). She typically has availability during mornings. Is there a day of the week (3/18) that is preference for OC? I am relatively open that week.

Chris

Yes - Chris, go ahead with directing Marcia's request to ERG. Jason, this seems like it falls within the EE TD so I don't expect to have to amend for this, however, I am planning an amendment to add funds soon.

Hey Chris,

Shaun said you all could help me out with the \$\$.

THANK YOU!

I am getting an est of the LOE by tomorrow. I should have the data elements that the contractor will need by 3/15. We are hoping to get the DI production data back from the contractor within a couple of weeks of that.

Do you want to set up some time to talk to the contractor early the week of 3/18?

Here is the SOW again, for your convenience.

Thanks! I am looking for some \$\$ to do a Drilling Info pull for low production wells with information gleaned from the NSPS 0000a compliance reports.

Here is the SOW. We had hoped to use the current contract with ERG that OC has for DI, but the money has expired. We don't have extra in the OC pot for 2019. I am getting an estimate from Rusty (our WAM) to see how much he thinks the query and analysis will cost.

So I am basically looking for capacity and money. I think Shaun and I might have talked about this last calendar year, but I have it a bit more fleshed out now.

Shaun,

Can you help Marcia? For Sounjay, I typically handled technical matters and he managed the contract & finances.

Thanks,

Chris
